

Australian Dental Centre of Excellence

Established in 2019, the Australian Dental Centre of Excellence (ADCE) is a purpose built training venue for dental continuing professional development programs for Dentists, Therapists, Hygienists and the Dental Industry. The ADCE is designed to conduct CPD courses to teach new techniques and theory through lecture, hands-on workshops, and live patient demonstration formats.

The ADCE has a lecture theatre that can seat 50 guests, a practical training room that seats 36, and a fully functional dental surgery that can be used for live patient treatment. This dental surgery is equipped with air and electric handpieces, as well as an intra-oral camera and a digital radiography suite. The surgery is suited for restorative, prosthetic, implant and endodontic procedures.

The teaching from each room can be viewed in any of the other rooms via the state of the art audio-visual system. This ensures that guests have a clear, high definition view of the lecture and demonstration content, with crisp audio (or music) through the in-ceiling speaker system. Presenters are fitted with a professional grade roaming microphone to ensure fluency in their lectures and demonstrations.

The ADCE was established with the assistance of several key Dental Industry Partners. As a result of their commitment to the Centre, the fitout includes the finest (and latest) dental materials and equipment. This ensures that the learning experience for guests is of the highest standard, and is never compromised by defective or missing instrumentation.

The ADCE also has a full sized kitchen and lunch room, which allows for meal preparation or for catering to be delivered. Guests can also enjoy tea and espresso coffee as well as chilled and sparkling water.

The stand alone Specialist Centre further enhances the Centre of Excellence concept. This separate space includes a patient reception area, a dental surgery, an OPG/CBCT/Lateral Ceph, separate sterilization facilities, an administrative office and a dental laboratory space. This Specialist Centre will be equipped with an Intra-oral scanner and chairside milling and printing units to complete the full digital workflow. The Centre has been designed for use for teaching and for a visiting Periodontist, Prosthodontist, Orthodontist or Oral Surgeon.

The ADCE is conveniently located in Woolloongabba, just 5 minutes by car from the Brisbane CBD. There is a Busway (Buranda) and Train Station (Park Road) just a few minutes walk away, and the proximity to the M7 Tunnel means that the ADCE is only 1 traffic light and 25 minutes from Brisbane Airport, allowing the possibility of guests arriving and departing for a course on the same day. There is also onsite parking for the Course Coordinators and the Specialists and patients of the Dental Specialist Centre.

The involvement of our Partners has also meant that this high-tech Centre can be made available for rental by other CPD providers and the Dental Industry, at very competitive rates. The rental rates are listed below:
